President's Message

Spring is in the air and I can't wait for the warmer weather. We are all saying and thinking "If you don't like the weather just wait five minutes." Spring in Idaho... we have to love and wait for it.

I'm sure excited about our next field trip, so get your rock picks ready for some fun. Our next adventure will be to our Wang Doodle claim; all the sorted details will be in this month's issue of the Grindings. Hope everyone will have a chance to make it out for some good digging.

Field trips and workshops are a bonus feature of belonging to the Gem Club, so I would love to see all the new members along with junior members taking part of all we have to offer.

Update on our Gem Show down in Turlock CA. I'm still impressed on what a wonderful show the Mother Lode Club puts on. Over the past years they have doubled the size and attendance of their show. Turn out was great and people still found some money to spend. Weather was also a nice bonus and enjoyed wearing short sleeves for a few days. The weather was sunny and clear over Donnor's Summit. Last year we had a snowstorm to plow through.

The Club workshops will be starting this month, details will also be found in this issue of the Grindings.

Brent Stewart
President

**MINUTES OF THE IDAHO GEM CLUB
GENERAL MEETING
March 19, 2013**

President Brent Stewart called the meeting to order at 7:30pm.

The Pledge of Allegiance was led by Jackson Neuhooff one of our Rocky Rattlers members.

Guests present were the Steve & Jean Longbottom.

Adult door prizes were drawn for 16 lucky winners.

There were 9 junior prize winners also.

Secretary report-----I would like to "thank" all the volunteers at the Kids table, Wheel of Fortune, and Grab Bags. We received several "thank you" cards: from the Longbottom's for their Grand Prize of the Amethyst Cathedral at our recent show and from Alice Stewart thanking Charles & Shirley McCreath for their giving her some spring flowers for her garden.

A motion to accept the minutes as printed in the "Grindings" was made by Phil Worley and seconded by Phil Neuhooff; the motion carried.

There were seven new members in attendance.

Treasurer's report--- Kathy spoke of new balances and disbursements. She also had information of our recent shows attendance and moneys earned from the show.

Federation report--- Charles spoke about the newest Federation Newsletter. He advised members to make reservations for the Butte Show for lodging. There are several fieldtrips being planned. He also spoke about Junior Achievement Submissions and Ed Moser talked about requirements. Rocky Rattlers interested should

speak to either Charles or Ed for additional information.

Junior's report--- Ed mentioned what the Rocky Rattlers would be doing this evening. He's also received some tumbled specimens they'll be receiving which were given to the Rocky Rattlers by Bill Anderson. Janelle and Coyote will also be helping with additional specimen identification.

Library report--- I've received a new Rock & Gem Magazine for the library which will be open at our break.

Workshop report--- workshops will begin in April or May.

License plate report-- Deanna is still working on the Facebook page and other advertising.

Phil Neuhooff will be giving our program tonight, he will discuss Zeolites and where they can be found. At this time Phil is also looking for volunteers for our refreshments and door prizes.

Old business-- Doug Renken wanted to personally "thank" everyone who helped with the show set-up and tear-down, also for all the help from volunteers who make our show the success it is.

Break was called at 8:13pm.

Program: Phil Neuhooff discussed "Zeolites" and locations they can be found.

The meeting was adjourned at 9pm.

*Respectfully submitted,
Melodee Worley - Secretary*

**MINUTES OF THE IDAHO GEM CLUB
Board Meeting
April 2, 2013**

President Brent Stewart called the meeting to order at 7:31pm.

Board members present were Willa Renken, Ed Moser, Phil Neuhoﬀ, Phil Worley, Melodee Worley, and Barb Carey.

Officers present were Melodee Worley.

Excused for the evening were Jim Clinton, and Charles McCreath. There was no word from Deanna Ashton. Kathy griffin was represented by Tony Griffin for the Treasurers report.

Guests present were Doug Renken.

A motion to accept the "Grindings" as printed was made by Phil Worley and seconded by Barb Carey; the motion carried.

Secretary's report--- mail received were a few bills for Kathy; a postcard notifying the club of an upcoming show at the Colorado Mineral & Fossil Show, from April 19-21, in Denver at the Ramada Plaza. I'll have the postcard available to see at the general meeting on April 16.

Treasurer's report-- Tony spoke of balances and disbursements.

Federation report-- Ed Moser spoke on behalf of Charles about an upcoming Tri-cities meeting on April 20. Additional information is available in the NFMS newsletter.

Juniors report--- BRING YOUR FOLDERS!!!!

Program: Our upcoming program is still being confirmed by Phil Neuhoﬀ. He is also working on new Scholarship Forms for this year's candidates.

Workshop report--- Willa said we would be resuming workshops this April 18 from 6:30 to 9pm. She will be needing donations of hot-dogs and buns. She'll also be needing instructors to help members and help with the larger saws and will have more information available at the meeting.

Old business--- we are still looking into options to get trailers to store our show materials.

There was no new business.

There were 6 applications for membership. A motion to accept was by Phil Worley and seconded by Ed Moser; the motion carried.

The meeting adjourned at 8:30pm.

*Respectfully submitted,
Melodee Worley - Secretary*

Hi Friends, Good to be home and hopefully on the long road to recovery. My problem was a sudden eruption of a blood vessel in my liver. It was a sad weekend to miss the show.

The gift of the bowl of plants is certainly great and unusual. Thank you and I will be back to some meetings when able.

Jim Dillion

Having Fun: Junior Activities
by Jim Brace-Thompson, Junior Activities Chair
(AFMS Newsletter April 2013)

Book Review for a Great New Kid's Book:
A Rock Is Lively

I work in academic publishing and as a result, I get sent to annual conventions of the American Library Association, where the huge halls of city convention Centers are filled to bursting with publishers and their books. In addition to fulfilling the duties of my day job, I always make a point of cruising the rows of trade publishers and children's book publishers to see if there's anything new worth recommending to clubs with pebble pups and juniors.

This year, I made a real gem of a find: *A Rock Is Lively*, by author Dianna Hutts Aston and illustrator Sylvia Long. Published in 2012 by Chronicle Books in San Francisco, this is as gorgeous to peruse as it is informative to read.

Long's colorfully detailed paintings of rocks and minerals on the cover caught my eye, as did the poster they were hand-ing out for free in the booth. As I read, I be-came hooked, learning new things that I imme-diately incorporated into a school presentation I had scheduled for the following week—such as the melting temperature of rocks, the oldest rocks found on earth, uses of rocks, and more.

A brief and easy read, with fun-filled facts on each page beautifully illustrated with richly colorful paintings, this is the perfect book to get for your club library and/or to recommend to your younger pebble pups. It'll show them that rocks are not only interesting and fun—but lively, too!

MINERAL MYTHS AND MEANINGS (AND A LITTLE SCIENCE)

FROM DAVE WESTER

Throughout the ages, man has held a deeper belief of gems and minerals, considering them to bring luck or associating them with health or life facts. When you think about it, there's probably a grain of truth to some of these myths because minerals, gems, and rocks are made up of the same compositions as the human body. If you've taken a chemistry class you'll know this to be true. This month is a little different.

In researching some new myths about rocks and gems, I ran across the following article written by Ellen Steiber, a rock hound turned author who besides collecting, now writes about rocks! I thought her comments on the mythology of gems might provide an interesting perspective on the overall concept of gemstone mythology. Writes Ellen Steiber (www.ellensteiber.com), much of the traditional gem lore that has survived was passed down through treatises on precious stones called lapidaries.

According to Maria Leach's Standard Dictionary of Folklore, "Belief in the supernatural properties of precious stones goes back beyond recorded history.

An early cuneiform tablet gives a list of stones facilitating conception and birth and inducing love and hate. These ideas of the ancients were woven into the astrological cosmos of the Baby-Ionians, but the early Greek lapidaries were essentially medicinal.

The early Christian church opposed magic and condemned engraved talismans, but tolerated the use of medicinal amulets, and developed a symbolism of its own based on the gems of Exodus and the Apocalypse.

"Because they were part of the science of the [Middle Ages], rather than magic, [lapidaries] were accepted as fact ...It was not until the later part of the seventeenth century that some of the more incredible virtues of gems were seriously questioned by the authorities. Even then, there was no uniformity of opinion, and what one physician discarded as untenable, another vouched for in good faith from his own experience."

"To add to the confusion, when you consult early stone lore, i.e., the works of Pliny the Elder or biblical or even medieval mentions of gems, there's great debate over which stones the writers were really referring to. For example, it's now believed that "sapphire" is the English translation of the biblical "sapur," but what "sapur" actually referred to was not sapphire but lapis lazuli. Though the word emerald derives from the Latin "smaragdus," Pliny's "smaragdus" was not the word for emeralds but a term that encompassed many green stones.

Interestingly, though, one possible origin for the word topaz is Topazio, an island in the Red Sea, which in Pliny's time was famous for its peridot mines, and there's wide speculation that, straight through the eleventh century, topaz, peridot, and citrine were all referred to as topaz. In the 14th century, the word caruncle was used to refer to garnets, rubies, and what might have been watermelon tourmaline.

Deana Ashton is our Sunshine Lady

Her job is to send some cheer to members who are ill, in need of prayers, or need some cheering up. Deana needs your help in accomplishing this, you can help by letting her know of anyone that is in need of a little sunshine. Deana will send a card or flowers depending on their situation or occasion.

Deana's phone number is 794-5628

April Program:

Dr. Charles Osgood will talk about the mystery of the Owyhee diamonds and his recent finds that shed light on that story.

Bench Tips

In a recent class we did a little work with patinas. and came across a couple web sites for those of you who'd like to explore this area, especially for copper and bronze.

The first is The Science Company at <http://www.sciencecompany.com/Do-It-Yourself-Patina-Formulas-W12C672.aspx> with plenty of formulas for a variety of colors. And there's more formulas at Tim McCreight's Brynmorgen Press web site at <http://www.brynmorgen.com/resources.html>

Small quantities of chemicals for making your own patinas are available from The Science Company at <http://www.sciencecompany.com/Patina-Chemicals-C672.aspx>

If you prefer to buy the patinas already for use, one of the best sources I've come across is Sculpt Nouveau at <http://www.sculptnouveau.com/> Don't miss all the instructional pdf's on the site and be sure to take a look at the videos showing how to use their products at <http://www.youtube.com/sculptnouveau>

In the Los Angeles area Sulpt Nouveau products are available at Industrial Metal Supply in San Fernando.

More BenchTips by Brad Smith can be found at [facebook.com/BenchTips](https://www.facebook.com/BenchTips) or groups.yahoo.com/group/BenchTips/

A great new book is out: "Gem Trails of Idaho and Western Montana"; by Lanny Ream.

Juniors need to bring their folders to the meeting this month

Idaho Gem Club Field Trip

Our field trip to the Queenstone claim was a very nice outing. We had 10 members ready to battle the 17 degree weather. But soon warmed to 44 degrees. Lot's of material was found.

Our next field trip will be to our Wangdoodle claim on 20 April 2013, we will meet at the ION station west of Marsing were Hwy 55 joins Hwy 95 at 7:00am.

Bring picks, shovel, screens, rock hammers, plenty of water and a lunch. A plastic bottle with water for storing your opal to keep the opal from desiccating. High clearance vehicle is required. See everyone there.

Happy Hounding

(Mineral Myths—continued from page 5)

“There’s another limitation you run up against when working with traditional lore, which is that often it only deals with the most commonly known precious and semiprecious gems.

Diamonds, rubies, sapphires, topaz, emeralds, pearls, turquoise, carnelian, jade, amethyst, garnet, lapis lazuli, coral, agate, jasper, amber, quartz, and even malachite, are all stones with substantial, multicultural bodies of lore. But it’s hard to find beliefs about minerals like labradorite, kyanite, or rhyolite in the older sources; for those you have to go to contemporary writers, and then you’re dealing with contemporary metaphysics which, though often drawing on ancient systems of belief, is another sort of language altogether.

“When I began writing about stones my approach was to research them and then find a way to use whichever bit of information intrigued me, but as writers work on books, their books work on them, and my fiction was working on me. I found that if I wrote about a stone, it helped to be able to hold it. Although this wasn’t possible in the case of diamonds and the expensive jewels, I have a number of semiprecious gems and crystals (plus lots of “ordinary” rocks) on hand, and holding them led to working with them, trying to sense what might be inside them as my characters do. This process is still new to me. Quite honestly, sometimes I pick up a stone and don’t feel a thing.

But other times, whether through the senses, intuition, or imagination, the rocks and crystals have given me inspiration and information, hinted at what they hold inside them. “There came a point when I realized there was no one truth about any given stone, and that I was, in fact, free to write whatever I wanted about them. This doesn’t mean I’ve stopped researching, gem lore, mythology, and mineralogy continue to fascinate me, or that I’m not careful about the qualities I ascribe to the stones in the novels. But I’ve come to believe that stones are as individual and unique as we are, and a great deal of what anyone perceives in a stone, beyond its geologic origins and specific mineralogical properties, is intuitive rather than definitive, and specific to the stone itself.

Via Rocky Trails 3/13, Golden Spike E-News
March 2013

YesterYear March 1971

George Fields reported on the upcoming rock show and some of the cases he would like to see at the rock show. North's Chuckwagon on Vista was selected for the Clubs dinner.

Quincy Howell ask for money to make 10 more cases for the upcoming show in January. At the Dinner a plaque was given to Quincy Howell for serving his year as President. He was also given a Rock Hammer.

There was a plaque to be given to Roy Bryant at a later date to be presented to Hilda Bryant at a later date as she could not be there. Pat Bethel President.

An effort was made too get another area in the Park this year as we needed one with more shade.

It was decided that members who put cases in the show would be given free passes, but if they wanted to enter in the show prizes they would have to buy tickets. This is the first year that ribbons would be worn by exhibitors. The field trips will start in March. The BSC Department will put a case in this year showing part of the Rodenbaugh display. (If it hasn't been moved it is on the second floor of the science building just at the top of the stairs.)

This is the first time a booth for the blind was to be in the show, where they could pick up the rocks and feel them. Ralph Tuttle received \$300.00 for advertising for the show. The March field trip will be to Graveyard point for sagenite.

*In Loving Memory
Patsy Bethel—Historian*

FILL A HOLE IN A CABOCHON

BY JIM DENNIS

Super Glue to the Rescue!

What if the cabochon you are cutting develops a "pit" or "hole" during the process of cutting and polishing? Do you toss the stone and hope for a better cut next time? Or was the rough too pricy to let a little "pit" bother you? Here's a simple way to fill the hole and no one will be the wiser, except you!

1. Fill the pit with Hot Stuff or other super glue.

2. Let the glue harden. You may need to repeat this step 2 or 3 times if the hole is deep.

(ED.WORD OF CAUTION, Have a bottle of super glue remover handy because super glue goes everywhere but where it should!)

3. Examine the stone under magnification to make sure the hole is totally filled.

4. Let the glue harden some more.

5. Regrind

6. Repolish on the end buffer of the Genie. Put a LITTLE BIT of WHITE VINEGAR in with the water in your water spray bottle—that will usually help bring up a nice polish.

Via— Tips & Chips, Nov. 2012 via Rock-Collector, Jan. 2013 via Chippers' Chatter Feb. 2013, Golden SpikeE-News March 2013

Rockhound "CODE OF ETHICS"

I will respect both private and public property and will do no collecting on privately owned land without permission from the owner.

I will keep informed on all laws, regulations or rules governing collecting on public lands and will observe them.

I will, to the best of my ability, ascertain the boundary lines of property on which I plan to collect.

I will use no firearms or blasting material in collecting areas.

I will cause no willful damage to property of any kind such as fences, signs, buildings, etc.

I will leave all gates as found.

I will build fires only in designated or safe places and will be certain they are completely extinguished before leaving the area.

I will discard no burning material - matches, cigarettes, etc.

I will fill all excavation holes which may be dangerous to livestock.

I will not contaminate wells, creeks, or other water supplies.

I will cause no willful damage to collecting material and will take home only what I can reasonably use.

I will practice conservation and undertake to utilize fully and well the materials I have collected and will recycle my surplus for the pleasure and benefit of others.

I will support the rockhound project H.E.L.P (Help Eliminate Litter Please) and will leave all collecting areas devoid of litter, regardless of how found.

I will cooperate with field trip leaders and those in designated authority in all collecting areas.

I will report to my club or Federation officer, Bureau of Land Management or other authorities, any deposit of petrified wood or other materials on public lands which should be protected for the enjoyment of future generations for public educational and scientific purposes.

I will appreciate and protect our heritage of natural resources.

I will observe the "Golden Rule", I will use Good Outdoor Manners and will at all times conduct myself in a manner which will add to the stature and Public Image of Rockhounds everywhere.

Watch out for these critters when you are rockhounding!

female & male tick

Well, it is finally here, the new season of workshops. Are you ready to make a cab or two?

Remember these are for all members or guests. So be sure to bring that special person or child that you want to get interested in our hobby. We will begin on Thursday, April 18th, from 6:30pm to 9:30pm.

There will be a fire so if you want hotdogs and buns, please bring them, I will have the condiments. I have marshmallows and graham crackers for s'mores, but you would need to bring chocolate; so

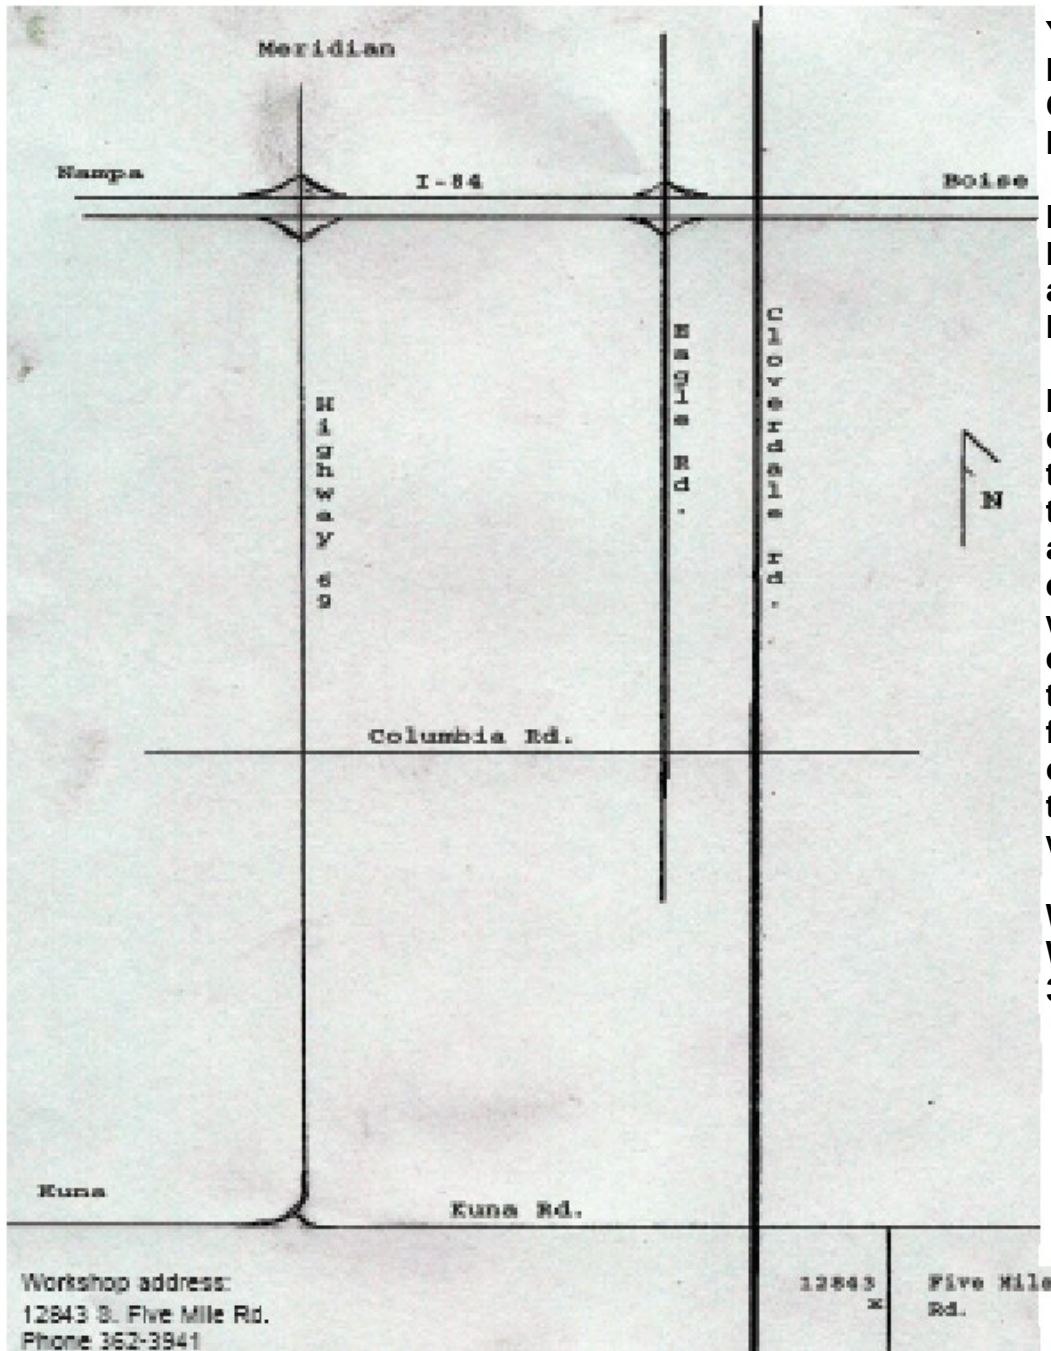

come one, come all to 12843 S Five Mile Rd.

You will need to get here off of Meridian and Kuna Rd. or Cloverdale and Kuna Rd. as Five Mile dead ends and starts again.

Marge Conley will be here to help you with the wire wrapping and there will be instructors to help with the cab making.

If you have a slab to make your cab out of feel free to bring it, there will be some material there to choose from if you don't have any. For those of you who have extra material, the workshop always needs donations so that everyone who comes has something nice to cut and chose from. Remember there is a charge for the wire wrapping but the workshop is free. I look forward to seeing you all.

Willa Renken
Workshop Chairman
